Meadowgrass Drive Water Main Replacement Project: Temporarily Delayed Due to Electrical Work

As part of our ongoing commitment to transparency and communication, Tualatin Valley Water District (TVWD) wants to inform you that the [Meadowgrass Drive Water Main Replacement Project](#) has been temporarily delayed while Portland General Electric completes planned electrical work in the area. TVWD is delaying the water main replacement to avoid additional disruptions to the area from construction and create safer work environments for both organizations.

Construction is now scheduled to begin late May 2024 and last about two months.

Once underway, TVWD's project will involve replacing 1,600 feet of the current six-inch water main with a new eight-inch ductile iron main under NW Meadowgrass Drive, from NW 174th Avenue to NW Somerset Drive. Water mains are underground pipes that carry treated drinking water from a water treatment plant to a customer's home or business.

[Access a map of the project area.](#)

When complete, this nearly \$500,000 project will strengthen the water system serving this area.

The District apologizes for any inconvenience caused by this delay. For the latest updates, visit the dedicated project webpage at TVWD.org/Meadowgrass. Additionally, we will send out an email closer to the start date to provide further details on the construction schedule and what to expect during the process.
